EDUCATION

MORINGA SCHOOL

FEB - NOV 2023

- Certificate in Software Development

JOMO KENYATTA UNIVERSITY OF AGRICULTURE & TECHNOLOGY

2016-

CERTIFICATES

- Certificate in Software Development : Moringa
- Certificate in 3D Animation & Film : Shang Tao Media Art College
- Oracle Java Programming SE Fundamentals : Computer Pride

AYIM WILLIAM

SOFTWARE DEVELOPER

PROFILE

A versatile full-stack developer skilled at transforming ideas into seamless digital solutions with a focus on user experience. Specialises in backend technologies like Python, Django, and MongoDB. Experienced in both independent work and collaborating with teams to deliver creative, functional web applications and meet key project milestones.

WORK EXPERIENCE

• DeV & Graphics KE (Intern - Junior Software Developer) (2022 - Present)

Internship Phase

- Assisted in the development, customisation, and maintenance of WordPress-based websites for clients, ensuring responsive design and functional consistency.
- Assisted in the development and maintenance of client websites using HTML, CSS and JavaScript.
- Supported senior developers in debugging, testing and refining existing applications to improve performance, usability & stability.
- Assisted in the testing of various API endpoints to verify correct request/response behaviour, data accuracy and error handling.
- Contributed to content updates, minor feature implementations & documentation to support ongoing projects.
- Collaborated with designers to implement UI/UX improvements, ensuring visual consistency and user-friendly navigation across platforms.

Junior Software Developer

- Developed and maintained full-stack web applications to deliver scalable solutions.
- Built and consumed RESTful APIs, integrated databases and implemented authentication and business logic for client systems.
- Took ownership of assigned features & modules from requirement analysis through implementation, testing and deployment.
- Participated in client support and system updates, resolving bugs and enhancing functionality based on user feedback.
- Migrated a payment integration module from Node.js to a Django-based backend, ensuring feature parity, security and reliable transaction handling.
- Integrated the Django payment module into a SaaS platform, supporting end-to-end payment workflows within the application.
- Containerised applications using Docker, hence, created consistent development and deployment environments that improved reliability, portability and collaboration across the team.
- Implemented Apache Kafka to support asynchronous communication and event-driven workflows, enabling scalable data processing and improved system decoupling within the application architecture.

• iTalanta Managed Internship - Intern - (27th Sept - 20th Dec 2023)

- Designed and implemented sleek, user-friendly web pages that adhered to the provided UI/UX designs, enhancing user satisfaction and ensuring seamless navigation.
- Delivered high-quality code through professional commits, maintaining clean and efficient coding practices that facilitated easier debugging and improved team collaboration.

SKILLS

- Teamwork & Agile methodology
- UX/UI Design & Web3 development
- Time Management
- Front-End & Back-End Development
- Server-Side Development
(Express.js, Node.js, REST APIs)
- Event-Driven Architecture (Kafka)
- Effective Communication & Technical Documentation
- Critical Thinking & Creativity
- Version Control & Collaboration (Git, GitHub Workflows)
- JavaScript (React, Next.js, Redux, TypeScript), HTML/CSS, Python (Flask, Django), SQL, & NoSQL (PostgreSQL, SQLite), CI/CD,
-

INTERESTS

- Writing & Reading
- Chess, Poker & Gaming
- Sports & Fitness
- Philosophy
- Game Development

- **Internet Computer Hackathon (16th Oct - 25th Nov 2023)**
 - Developed decentralised applications using ICP blockchain technology to tackle challenges in digital service accessibility, data security, scalability, and interoperability, contributing to innovative solutions in blockchain ecosystems.
- **Moringa School - Software Development Technical Mentor (5th Jun 2024 - 30th Jun 2025)**
 - Updated and refined the curriculum to align with current industry standards and emerging technologies, enhancing the relevance and quality of learning materials for aspiring developers.
 - Mentored and supported young developers by fostering collaboration and peer learning through structured initiatives, resulting in improved technical skills and stronger teamwork among participants.
 - Reviewed students’ code submissions in Python and JavaScript, focusing on best practices, performance optimisation, and robust unit testing with Mocha and pytest, ensuring high-quality deliverables and readiness for real-world development challenges.
 - Facilitated technical sessions, catch-ups, tutorials & walkthroughs to clarify complex concepts, thus helping learners bridge theory and practical implementation.
 - Guided learners through real-world development workflows, code reviews, and project-based learning, strengthening their readiness for professional software development environments.
 - Acted as a bridge between students and the curriculum team by identifying learning gaps, common blockers and opportunities for content improvement.
- **Cenex Consult - Lead Software Developer (3rd March 2025 - Present)**
 - Led the full development lifecycle of the Nairobi County-owned AQDMS platform, delivering an operating system adopted by 100% of Nairobi County.
 - Designed & implemented system architecture that integrates sensor data ingestion, validation pipelines, analytics workflows & a publicly accessible data portal and county dashboard.
 - Developed backend services, APIs & database models supporting pollutant monitoring, sensor metadata management, historical data retrieval & automated reporting for county users.
 - Collaborated with Nairobi County and stakeholders to align technical requirements with policy, ICT infrastructure & environmental management goals.
 - Produced technical documentation, system flow diagrams & deployment guidelines to support long-term maintenance.
 - Supported deployment, configuration & environment setup in collaboration with the county ICT team to ensure compliance with government hosting and security requirements.
 - Provided post-deployment technical support and knowledge transfer, ensuring county technical teams could operate, maintain and extend the system independently.
